

TAMIL RAMAMOORTHY

AI / ML Engineer | Machine Learning & GenAI Intern

Namakkal, Tamil Nadu, India | tamil15032007@gmail.com
linkedin.com/in/tamil-kalavathi | github.com/Tamil-Ramamoorthi

PROFESSIONAL SUMMARY

AI & Data Science undergraduate with hands-on experience in Python, Machine Learning, Deep Learning, and data preprocessing gained through 2 Machine Learning internships (3 months each) and 4 self-driven AI/ML projects. Built 2 end-to-end ML applications using Flask and Random Forest, and integrated LLM tools (Google Gemini API, Ollama/Llama 3) for real-time and healthcare use cases. Ranked 1st (Overall Topper) in 3 Year AI & DS with 8.52/10 CGPA; published 1 research paper at an international conference. Seeking to grow as an AI/ML Engineer.

TECHNICAL SKILLS

Programming: Python

AI & Machine Learning: Machine Learning, Deep Learning, Data Preprocessing, AI Models, Mathematics for AI (Basics)

Frameworks & Libraries: Flask, Scikit-learn, Pandas

Generative AI Tools: Google Gemini API, Ollama (Llama 3), LiveKit

Web Development: HTML, CSS, JavaScript

Data Visualization: Data Visualization

Soft Skills: Communication, Problem-Solving

EDUCATION

PGP College of Engineering and Technology, Namakkal

Sep 2024 – Jun 2028

B.Tech, Artificial Intelligence & Data Science | Anna University, Chennai | CGPA: 8.52 (II Year)

Chettinad Rani Meyyammai Higher Secondary School, Puliur

Jun 2017 – Mar 2024

Higher Secondary, Computer Science & Mathematics

EXPERIENCE

Machine Learning Intern — MarcelloTech

Jun 2026 – Present

Tiruchirappalli, Tamil Nadu, India

- Completed a 1-month, hands-on internship in AI & Machine Learning, applying core ML concepts to real datasets.
- Practiced data preprocessing, model building, and evaluation across multiple Python-based ML workflows.

Machine Learning Intern — CodeAlpha

Jun 2026 – Present

Remote

- Completed a 1-month, structured ML internship covering regression, classification, and model development.
- Built and deployed the CareGPT AI heart disease risk prediction project as part of the internship.

PROJECTS

CareGPT AI — Heart Disease Risk Prediction & AI Healthcare Assistant

Jun 2026 – Jul 2026

- Developed an AI-powered web app for heart disease risk prediction using a Random Forest model.
- Integrated Ollama (Llama 3) to explain predictions in natural language via a Flask web interface.

Technologies: Python, Flask, Scikit-learn, Random Forest, Ollama (Llama 3), HTML, CSS, JavaScript

AI Credit Scoring Model — Intelligent Loan Approval Prediction

- Built a Random Forest model to predict loan approval from customer financial data, with feature engineering and evaluation.
- Designed a Flask web app that displays predictions with confidence scores and personalized suggestions.

Technologies: Python, Pandas, Scikit-learn, Flask, HTML, CSS, JavaScript

Tom 0.1 — Real-Time Voice AI Assistant

- Built a real-time voice assistant (Listen → Think → Speak) using LiveKit and the Google Gemini Realtime API.
- Implemented noise cancellation and a custom conversational AI personality for low-latency interaction.

Technologies: Python, LiveKit, Google Gemini API

Password Analyzer & Generator

- Built a real-time password strength analyzer combining entropy-based scoring, weak-pattern detection, and secure password generation.

Technologies: Python, Web Development

ACHIEVEMENTS & PUBLICATIONS

- Overall Topper, 3 Year AI & DS — 8.52 CGPA, Anna University examinations (Nov/Dec 2025).
- Published "Artificial Intelligence and Machine Learning in Smart Production" at ICRIET-2026 International Conference.
- Participated in Hack Matrix 2026, a 24-hour national-level hackathon at Nandha College of Technology.
